615 W. Grand River Ave.

Brighton, MI 48116

o: 810-229-6640 f: 810-229-1619

---

## FIRE HYDRANT FLOW TEST SCHEDULING PROCEDURES

If an automatic fire sprinkler system is being installed, the designer or contractor must obtain current (within 12 months) water flow information. Arrangements to flow hydrants to obtain water flow information shall be made with the appropriate water authority listed below. When an appointment has been secured from the proper water authority, contact the Brighton Area Fire Authority with the hydrant's date, time, location, and jurisdiction. The Brighton Area Fire Authority shall witness the hydrant flow test for information verification. Unwitnessed tests may be rejected, and a new test may be required. Contact the fire authority at 810-229-6640 once you have scheduled your test.

Flow test procedures shall comply with NFPA 291 for the most efficient testing. Tests shall be conducted for accuracy during peak usage hours.

Required backflow prevention devices are at the discretion of the water authority.
