

# BRIGHTON AREA FIRE AUTHORITY

615 W. Grand River Ave.  
Brighton, MI 48116  
o: 810-229-6640 f: 810-229-1619

---

## BRIGHTON AREA FIRE AUTHORITY FLOW TESTING PROCEDURES

If an automatic fire suppression system is being installed, current water flow information must be obtained by the designer or contractor. Arrangements to flow hydrants to obtain water flow information shall be made with the appropriate water authority listed below. When an appointment has been secured from the proper water authority, contact the Brighton Area Fire Authority with the time, date and location of the hydrant and jurisdiction. The Brighton Area Fire Authority shall witness the hydrant flow test for information verification. Unwitnessed test may be ruled invalid and a new test required. Contact the fire authority at 810-229-6640 once you have scheduled your test.

Flow test procedures shall comply with NFPA 24 (Standard for the installation of private fire service mains and their appurtenances). It is recommended to comply with NFPA 291 for the most efficient testing.

Contact the appropriate water authority for the proper required backflow device used in that jurisdiction.
